

## The numbers which are divisible by two and three

In this section we will first determine the numbers which are contained in the index of Qur'ān that are divided by two and by three. Then, we will investigate whether a mathematical harmony exists between them or not.

In the following list, the numbers contained in the index of Qur'ān which are divisible by two and by three are marked:

List-83

## www.symmetricbook.com

 Let us now divide the numbers in the index of Qur'ān into two categories of homogeneous and non-homogeneous, with respect to “divisible by two and by three”.

 Example for the surahs with homogeneous sequence numbers and number of ayats:

30      Al-Rūm      60

Al-Rūm is a homogeneous surah. Forwhy, both the sequence number and the number of ayats, meet the condition of “divisible by two and by three”. Therefore, al-Rūm surah is homogeneous in this respect.

1      Al-Fātiḥa      7

Surah al-Fātiḥa is also a homogeneous surah. Forwhy, neither the sequence nor the number of ayats, meets the condition of “divisible by two and by three”. Therefore, al-Fātiḥa surah is homogeneous in this respect.

 Example for the surahs of which their sequence numbers and number of ayats are not homogeneous:

6      Al-En‘ām      165

The sequence number of al-En‘ām surah meets the condition of “divisible by two and by three”, whereas it's number of ayats does not cover this condition. Therefore, al-En‘ām surah is not homogeneous in this respect.

5      Al-Māidah      120

The number of ayats of al-Māidah surah meets the condition of “divisible by two and by three”, whereas it's sequence number does not cover this condition. Therefore, al-Māidah surah is not homogeneous in this respect.

The set of surahs which are homogeneous with regard to “divisible by two and by three” of the sequence numbers and the number of ayat.
